Our Presentation at JIAM 2016 OSAKA

At JIAM 2016 Osaka, we, Yamato will propose various solutions for the recent increasing demands for “Automation” in knitwear (Athletic Wear, Intimate Wear, T/Polo etc.) production, to secure your productivity and to standardize good quality, without relying so much on skillful hands, such as...

- Semi-automated workstations, designed to deskillize critical sewing operations and to improve finishing quality dramatically, without sacrificing productivity.
- Value-adding workstations for standardized finishing sizes, while saving material waste.
- Stress-free workstations to minimize downtime without requiring operators to pay so much attention.
- Superior fundamental function of machines to meet various sewing conditions.
- ... and many more.

Also, we are to show our high performance machines and saving packages for Tailored garments as well as jeans.

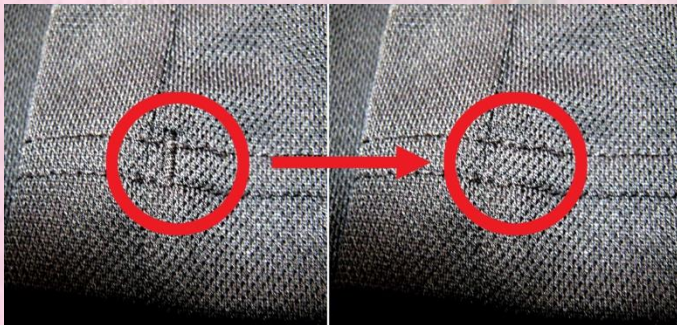

Examples of Solutions We Propose:

Twist-free flat hem, without skilled hands???

Neat neckline, free from shape-off and puckering???

Tacking can be eliminated, without risk for seam unravelling???

200%+ seam elasticity to save you from consumer claims???

Minimized risk for oil spots, as well as downtime and environmental impact???

Please don't miss your chance to experience YAMATO's true "Automation" at JIAM 2016 Yamato Booth, 4-201, Hall 4. We look forward to welcoming you to Osaka, our hometown, and assist you to find out eye-opening and practical solutions for issues you need to address for now and future.
